№ 012/21
June 4, 2021

Today, the European Union is a major trading partner, in particular for Ukraine. The conclusion of EU trade agreements with third countries provides new opportunities for economic growth and development, granting preferential trade, creating new instruments of economic growth, attracting investment; mobilization of specialists contributes to the liberalization of bilateral relations and integration into global trade flows.

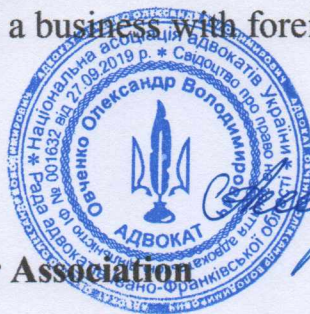

But to ensure the development of entrepreneurship between Ukraine and the European Union, we need quality specialists in the field of EU commercial law, EU antitrust law, EU corporate law. Unfortunately, there is a lack of knowledge among lawyers, law firms in this field.

Therefore, participation in the Jean Monnet Module "Commercial Law of the European Union" is a great opportunity to eliminate this lack of knowledge about special EU legislation.

Jean Monnet Module "Commercial Law of the European Union" provides an analysis of the legal framework and forms of trade agreements between the EU and third countries that are important theoretically for identifying the best format for trade relations and current trends of further economic integration, as well as practical significance in order to determine the potential economic effect of the implementation of these agreements.

During the course of the Jean Monnet Module "Commercial Law of the European Union", I gained new knowledge about the law of EU companies, basic directives and regulations of EU law. I can prove from my experience that new knowledge helps to serve a business with foreign capital better.

Attorney at law of
Ukrainian National Bar Association

Oleksandr Ovchenko
